

82 years old and,
thanks to us,
still a swinger.

At Joint Health Services at South Lake Hospital, we help patients enjoy an active lifestyle by providing the area's best orthopedic care. We treat sports-related injuries and orthopedic problems, as well as specialize in total joint replacements for the hip, knee and shoulder. We also offer an excellent rehabilitation program through the National Training Center, located on the South Lake campus. If you have the will to be active, we'll give you the way.

For more information, call (352) 394-4071.
